TAREQ MHYSEN

Artificial Intelligence & Data Science Engineer

+963940843133 Tareq.syria2002@gmail.com Rif Dimashq, Manin, Syria

SUMMARY

AI Engineering and Data Science graduate with a robust foundation in artificial intelligence, machine learning, and software development. Proficient in creating intelligent applications utilizing Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and cutting-edge AI frameworks. Adept at designing and implementing comprehensive systems that incorporate knowledge bases, vector databases, and large language models to provide precise, context-sensitive solutions. Driven by a passion for applying AI to solve tangible challenges and devoted to continuously embracing new technologies.

TECHNICAL PROJECTS

Agentic AI Academic Advisor — September 2025- December 2026

IntelliPath (Senior Project II)

- Agentic AI Academic Advisor using RAG & LLMs.
- Achieved top performance in this capstone project.
- Technologies: Python, LangChain, Llama 3, FAISS, RAG, Hugging Face.

AI Image Super-Resolution — January 2025- June 2025

ISR (Senior Project I)

- Developed advanced AI models (CNNs, GANs,
- Transformers like SwinIR) to enhance low-resolution images.
- Achievement: Demonstrated outstanding technical proficiency.
- Technologies: TensorFlow, SwinIR, ESRGAN, OpenCV, PSNR, SSIM.

Malware Detection — October 2024- January 2025

Intelligent Malware Analytics (Junior Project)

- Developed an intelligent agent for threat analysis, detection, and classification of malware using AI and visual representation analysis of exe files, achieving over 98% accuracy.
- Achievement: Recognized for exceptional innovation and technical execution.
- Technologies: Python, TensorFlow, DenseNet201, Scikit-learn.

Brain Tumor Classification

- Classified brain MRI images into tumor classes using ResNet50 achieving an AUC of 0.8796.
- Technologies: TensorFlow, DenseNet50, MRI Dataset, ROC-AUC.

AI Air Drawing

- Created an air drawing application that tracks hand movements in real-time to draw on a virtual canvas.
- Technologies: Python, OpenCV, MediaPipe, NumPy, PyAutoGUI.

Text Summarization

- Built an abstractive text summarization tool using Transformer models togenerate concise and meaningful summaries.
- Technologies: Hugging Face Transformers, BART, NLTK, Streamlit.

IoT Smart Home

- Designed a smart home system to control appliances and monitor sensors using Raspberry Pi and IoT technologies.
- Technologies: Python, Raspberry Pi, MQTT, Flask, SQLite, Sensors.

PSO Optimization

- Implemented Particle Swarm Optimization to solve real-world optimization problems efficiently.
- Technologies: NumPy, Matplotlib, Optimization Algorithms.

EDUCATION

- **Bachelor's in AI Engineering & Data Science** **2021 – 2026**

Syrian Private University (SPU), Damascus, Syria
Graduated with exceptional performance in technical projects, demonstrating strong practical application of AI principles.

CORE SKILLS

Programming Languages

- Python • Java • C++ • SQL • C# • Bash

AI & Machine Learning

- Machine Learning • Deep Learning • LLMs • RAG
- Natural Language Processing • Prompt Engineering
- Computer Vision • Data Preprocessing • Model Evaluation

Frameworks

- PyTorch • TensorFlow • Scikit-learn • LangChain
- LlamaIndex • FastAPI • .NET

Tools & Technologies

- Neo4j • Qdrant • FAISS • Docker • Git • Postman
- VS Code • Jupyter • Linux • Streamlit • Hugging Face

Databases

- MySQL • PostgreSQL • MongoDB

Concepts

- Data Structures • Algorithms • OOP • RESTful APIs
- Vector Databases • Embeddings • Knowledge Graphs

CERTIFICATIONS

- DeepLearning.AI & Coursera
  - Generative AI with Large Language Models
  - Neural Networks and Deep Learning
  - LangChain for LLM Application Development
  - LangChain Chat with Your Data
- Syrian Youth Assembly | Global & Coursera
  - Generative AI for Enhanced Content Creation
  - Generative AI Primer
  - Generative AI in Marketing
  - Prompt Engineering for ChatGPT
  - Generative AI Content Creation
  - Editing and Enhancing AI Generated Content
- Google for Education
  - Gemini Certified Student (K12)
  - Gemini Certified Educator
  - Gemini Certified Student (University)
- MySQL Workbench
  - Database Creation and Design

KEY ACHIEVEMENTS

Model Accuracy Improvement
Optimized model performance, achieving a 15% increase in accuracy through the implementation of advanced neural networks and sophisticated machine learning techniques.

Malware Detection Success
Attained a high-precision 98% malware detection rate by developing and deploying novel AI-driven threat analysis methodologies.

Image Resolution Enhancement
Successfully enhanced image resolution by 25% utilizing transformative AI models, showcasing deep technical proficiency in computer vision.

TAREQ MHYSEN

Artificial Intelligence & Data Science Engineer

+963940843133 Tareq.syria2002@gmail.com Rif Dimashq, Manin, Syria

WORK EXPERIENCE

IT, Media & AI Solutions Specialist
Artizan Interior Design (Syria & Dubai) 2023 – Present

- Manage and support IT infrastructure, system maintenance, and technical support to ensure smooth operations across Damascus and Dubai branches.
- Coordinate and implement technology, digital media, and AI-driven initiatives to improve performance and productivity.
- Lead multimedia production and content development, delivering high-quality visual assets and marketing presentations aligned with the luxury interior design portfolio.
- Utilize AI tools and automation to enhance creative workflows and strengthen digital presence in local and international markets.
- Act as liaison between technical and creative teams to ensure effective collaboration and consistent brand representation.

IT Systems Coordinator & Team Manager
Wael Coating & Decoration, (Sheraton, Damascus) 2022 – Present

- Manage and support IT infrastructure to ensure smooth operations.
- Lead and coordinate teams to meet project goals efficiently.
- Enhance workflows using digital media and AI tools.
- Facilitate communication between technical and administrative departments.
- Oversee technical maintenance and provide staff training.

PROFESSIONAL EXPERIENCE

Mobile & Laptop Specialist 2018 – Present
Applied analytical and problem-solving skills to diagnose and resolve complex hardware and software issues in mobile devices and laptops, enhancing system performance and user satisfaction. Gained extensive experience in technical troubleshooting, system optimization, and customer support within a fast-paced retail and service environment.

Freelance Photographer 2015 – Present
Utilized advanced digital imaging techniques and potentially AI-powered tools for photo enhancement and manipulation, demonstrating a keen eye for detail and visual aesthetics. Developed strong project management and client communication skills through managing diverse photography assignments.

Freelance Graphic Designer 2020 – Present
Designed impactful visual identities and marketing materials, applying principles of visual communication and user experience to create compelling digital and print content. Leveraged creative problem-solving to translate complex ideas into clear, aesthetically pleasing designs, demonstrating adaptability and attention to detail.

VOLUNTEERING

ANNUAL ROBOTIC COMPETITION

- Contributed to the organization and support of the annual robotic competition, fostering innovation and technical collaboration.

SPU Student Support & Organizing Committee (2025-2026)

- Provided essential support and organizational assistance within the faculty, enhancing student experience and operational efficiency.

Designer / Supervisor - College Volunteer Team

- Led and supervised design initiatives, offering IT support and creative guidance to fellow students.

Editor / Developer - @SPU_ITbot

- Actively contributed to the development and content creation of the official SPU student Telegram bot, improving student communication and access to information.

University Photography Team

- Documented key university events and activities, applying photographic skills to capture and convey institutional narratives.
